

Ging Ge Li

NL-Utrecht · (+31) 06 4082 8138 · ginggeli@hotmail.com

Aspiring Machine Learning and Data Engineer passionate about automation, robotics, and intelligent systems. Experienced in data processing, computer vision, and building end-to-end ML pipelines.

Experience

Machine Learning Engineer

BUas Project in collaboration with NPEC

01/2025 - 06/2025 | Utrecht, Netherlands

- Performed data augmentation and cleaning on plant image datasets
- Built and optimized ML models to segment root, shoot, seed, and occluded parts
- Integrated segmentation output with robotic systems for automated microbial treatment

Data Engineer

BUas Project in collaboration with Argaleo

09/2024 - 01/2025 | Den Bosh, Netherlands

- Web scraped and collected logistics and freight movement data
- Cleaned and structured area-level data for analysis
- Built and optimized pipelines for the data science team

Software Developer

Internship at RockIt

04/2021 - 02/2022 | Hilversum, Netherlands

- Created a desktop motion-tracking app using camera input (Windows)
- Designed a rewards system linking physical activity to discount vouchers
- Deployed and tested the app in a cafeteria to promote an active lifestyle

Skills

Data Processing

- Data extraction & cleaning
- ETL pipeline development
- Web scraping

Machine Learning & AI

- Supervised & unsupervised learning
- Model training, tuning & evaluation
- Feature engineering & selection
- Image processing

Tech Stack & Tools

Python · R · SQL
Git · Docker · Jupyter · VS Code
Django · FastAPI · Flask · DRF
PostgreSQL · SQLite · JSON · Trello

Education

B.Sc. in Applied Science – Data Science & AI

Breda University of Applied Sciences
2022 - 2026 | Breda

Built real-world machine learning systems with end-to-end pipelines in collaboration with external partners.

MBO 4 – Software Development

ROC van Amsterdam College Hilversum
2019 – 2022 | Hilversum

Designed and built software systems from diagrams to deployment through practical, hands-on projects.

Intrest

- Building my own software projects
- Learning and experimenting with robotics
- Playing wheelchair hockey
- Going to the gym
- Watching sunsets with a cold drink
- Absorbing caffeine
